March 2022

[www.PrescottCreeks.org](http://www.PrescottCreeks.org)

Hello Friend,

In addition to the noticeably longer days and warmer temperatures, the swelling of arroyo willow buds, and the nesting of birds, Spring for Prescott Creeks marks preparation for Granite Creek Cleanup. Below you'll find information about the Cleanup and the Sponsors who make it possible for almost 500 people to gather annually to do their part in making the community a little bit better than they found it. Please click through the links to learn more and Pre-Register today.

## Granite Creek Cleanup

Saturday April 23rd, 2022  
Granite Creek Park | 8 AM – Noon

- Make a Difference
- Help Clean Up Your Community
- Cleanup T-shirt for all [Pre-Registered](#) Participants
- It's Free!

*(in exchange for a few hours of your service to the community)*

This annual event not only cleans up and beautifies the community, it also provides an opportunity for people to come together for a common cause and make a difference.

## Pre-Registration Required

[Pre-Register Here](#)

*Pre-Registration Closes March 30th*

Creeks Connect Community! Join almost 500 of your friends and neighbors by volunteering to cleanup a reach of creek, park, or trail. Get outside and get dirty while making a difference!

## Help Behind the Scenes

[Help Behind the Scenes](#)

*Apply to Help Behind the Scenes*

Behind the Scenes help is critical to making the Granite Creek Cleanup happen. We couldn't do it without everyone who helps organize and coordinate from behind the scenes. Apply to Help Behind the Scenes.

## 2022 Premier Cleanup Sponsor

We're pleased to welcome Findlay Prescott Subaru as our Premier Sponsor again this year!

### What Findlay said when we asked why they support the Cleanup:

*"All Subaru products are manufactured in zero-landfill production plants and Subaru of Indiana Automotive, Inc. is the only US automobile production plant to be designated a backyard wildlife habitat by the National Wildlife Federation. Findlay Subaru Prescott, giving back to the community and making the world a better place!"*

Prescott Creeks is a 501(c)(3) non-profit organization with a mission to achieve healthy watersheds and clean waters in central Arizona for the benefit of people and wildlife through protection, restoration, education, and advocacy.

## STAGE I FIRE RESTRICTIONS

TAKE ACTION

DONATE

Hello Friend,

It's that time of year where the weather is becoming progressively warmer and life is taking hold all around us. Birds are nesting, a multitude of plants are flowering and adding splashes of color to the landscape all around us. Spring in Prescott usually features winds whipping with a frenzy, drying the landscape at an alarming rate. Granite Creek in Watson Woods Riparian Preserve is quickly becoming a trickle and protection from wildfire is on our minds! In this issue of the Prescott Creekside E-News we celebrate the completion of the Granite Creek Cleanup, shed some light on what was found, recognize those who made it a success, and highlight additional ways that you can work with Prescott Creeks to achieve healthy watersheds throughout the year.

### Cleaned Up Creeks

2022 marked the 15th year for Granite Creek Cleanup under Prescott Creeks' leadership and the community was eager for the event! **584 people** showed up at Granite Creek Park on the morning of April 23rd and headed off to almost **50 locations** around the watershed to collect trash and debris from the creeks. **1.83 Tons** of trash and debris, along with **14 tires**, were collected during the 4-hour event! [Read more...](#)

Tyler & Bronson Prehn cleaning up along Granite Creek.

Photo by Virginia Wertz

**SAVE THE DATE:**  
**2023 Granite Creek Cleanup**  
**Saturday, April 22, 2023 (Earth Day!)**

## What was in there?

For the first time ever Prescott Creeks worked with the City of Prescott to audit the trash collected during the Cleanup. We sampled ~38% of the trash collected and found 57% of it to be Plastic! Trash fell into 18 categories ranging from plastic to metal to yard waste to bone. [Read more...](#)

## Who made it possible?

Sponsors and partners make this event possible! **Findlay Subaru Prescott** was the **Premier Sponsor** for a second year. The City of Prescott (Recreation Services and Solid Waste Division) and the Yavapai County GIS Department were critical operational partners making it all happen! [Read more...](#)

## Ways You Can Help Throughout the Year

Prescott Creeks is supported by a passionate community of volunteers. You can celebrate the watershed and its many creeks and lakes by lending a hand. Your volunteer service is an essential part of protecting nature, controlling pollution, and conserving wildlife.

**TAKE ACTION**

**DONATE**

Hello Friend,

Thanks for clicking in to read the September issue of the Prescott Creekside E-News! It has been a busy summer working with volunteers to remove non-native plants from Watson Woods Riparian Preserve, responding to weather-related issues in the field, and planning for future projects - like revegetation, trail improvements, and murals along the creeks. More on those projects in a future issue of this newsletter. Read on to learn more about recognition for the Granite Creek Cleanup, Monsoon activity, volunteers, and native plantings in the Preserve. Thank you to all the donors and volunteers supporting the work of Prescott Creeks!

---

## Voluntary Environmental Stewardship Program

Join Prescott Creeks at  
**Prescott City Council Chambers**  
**201 S. Cortez St.**  
**Tuesday, 13 September 2022**  
**3:00 PM**

Thanks to Yavapai County Supervisor (and previous Prescott Mayor) Harry Oberg's nomination, the annual **Granite Creek Cleanup** event will be recognized as a Copper Level Member of the Arizona Department of Environmental Quality's (ADEQ) [Voluntary Environmental Stewardship Program](#). The Program (VESP) recognizes and awards incentives to Arizona businesses and other organizations that have a good history of environmental compliance and strive to go beyond what is legally required to protect public health and the environment. Participants in the program can access tools and strategies that support their existing environmental programs and find opportunities to further reduce costs and spur innovation.

Morgan O'Connor, ADEQ Community Liaison for Coconino, Mohave & Yavapai Counties, will present a certificate to Prescott Creeks, the City of Prescott, and Yavapai County for cleaning up a total of 51.7 tons of trash to protect and enhance public health and the environment with 7,045 community volunteers working together to achieve a common goal with the Granite Creek Cleanup event between the years 2007 and 2022.

Prescott Creeks Executive Director, Michael Byrd, will be present to accept the certificate and express appreciation for the many people who have been involved over the years. [Read more...](#)

## 2022 Monsoon!

The 2021 Monsoon registered as the 8th wettest on record for Prescott according to the National Weather Service. Readings at the Prescott Creeks Office rain gauge suggest that the 2022 Monsoon could nose its way into the top 10 wettest monsoons with just a little more rain this month. At the Prescott Creeks office, just west of Watson Woods Riparian Preserve and the Sundog Ranch Road Wastewater Treatment Plant (one of the official rain gauges for the City of Prescott), we've recorded a total of 12.61 inches of rain since the start of the monsoon on June 15th. The month of June had 0.97 inches while July had 5.40 inches. August had 6.24 inches of rain. We've recorded no precipitation for September... yet.

2014 shows as the wettest monsoon on record and almost all of that precipitation arrived in the months of August and September. We still have over 20 days left in the 2022 Monsoon season! [Read more...](#)

Hello Friend,

This morning I spoke to a college-level *Natural History and Ecology of the Southwest* class and found myself excited by their thirst for knowledge about local watersheds and riparian areas. The students' questions were relevant and aligned with much of the content in the E-Newsletter below. They were curious about how water arrives in and travels through the watershed. They wanted to know how Prescott Creeks assesses project performance and they were interested to know about activities in which they could get involved to make a difference. Read on and you also will learn about these things.

As always, thank you for your support of Prescott Creeks!

## 2022 Monsoon Season Wrap Up

According to the National Oceanic and Atmospheric Association (NOAA) office in Flagstaff the Monsoon Season in Northern Arizona officially runs from June 15th to September 30th each year. However, we don't typically begin receiving monsoon moisture until the beginning of July. NOAA also indicates that that much of the Northern Arizona area receives 40-50% of its annual precipitation during the Monsoon Season. To date in 2022, Prescott has received almost 84% of its precipitation during the Monsoon. See the chart below for more information about precipitation at three different rain gauges during the Monsoon.

2022 - Monsoon Precipitation at Watson Woods Riparian Preserve, Prescott Creeks Office, & NOAA Official Rain Gauges

Using the official Sundog gauge total of 13.78" sets 2022 as the 5th wettest monsoon on record, while using the unofficial Office total of 14.97" as the 4th wettest. This is good for our watersheds and their riparian areas! [Read more...](#)

## Master Naturalist Class

What is a “Master Naturalist” you say? In short, a Master Naturalist is a certified volunteer who is passionate about nature and is eager to share their knowledge with others. If you are interested in ecology and natural history of the Arizona Central Highlands, would like to learn more, and would like to invest your time in working with others of a similar mind, you can develop your skills and leadership through participation in the 2023 Arizona Central Highlands Master Naturalist Course.

Info Sessions to Learn More:

- Thursday November 3rd
- Thursday December 1st.

Course dates are from January 3rd through April 25th, and cost is \$525.

## Change Over Time – Photographic Monitoring Results

Photographs are indispensable tools to qualitatively document and assess change in any environment. Simply put, they show change over time in a very relatable form. While photographic monitoring alone is not a complete monitoring program to assess project performance and change, they are an important “tool” we have in our “toolbox” for keeping track of what is happening out on the ground.

Formal photographic monitoring at Watson Woods Riparian Preserve was initiated in 1997 as part of our first vegetation characterization. Other Photographic monitoring points were later established in about 2005 that feature images from both within the Preserve, along the boundary, and from high points that area around the site. In 2009, additional photo-points were set up specifically to monitor and assess the \$1.5 million ecological restoration project which took place from 2009 to 2013. These photo-points are periodically visited to collect current images and assess change. Below is an example of how these photos can show change over time!

SEPTEMBER 2009 - GRANITE CREEK

SEPTEMBER 2022 - GRANITE CREEK

These photographs show changes within the Preserve that all suggest the ecological restoration project is trending in desired directions. For more information and interpretation of the photos above, [Read more...](#)

### ***Breaking News:***

#### **Miller Creek Revegetation Project**

Last week on the 25th of October, the Prescott City Council authorized funding that will, among other things, allow for the revegetation of the creek and its banks with native vegetation. Prescott Creeks will lead this effort with the City of Prescott, Fann Contracting, and community members. The project will feature multiple opportunities for community involvement. [Read more...](#)

---

#### **Granite Creek Master Plan Improvements Project**

Set to begin the week of October 31st, 2022, the project consists of improvements to the trail corridor that parallels Granite Creek between Aubrey Street and Granite Creek Park. Improvements will be made to the trail and to the creek channel riparian habitat. [Read more...](#)

### Granite Creek Master Plan Improvements Project

FALL 2022

The City of Prescott and their contractor, Asphalt Paving & Supply, are set to begin the Granite Creek Master Plan Improvements Project the week of October 31, 2022. The project consists of improvements to the trail corridor that parallels Granite Creek between Aubrey Street and Granite Creek Park. Trail improvements consist of new lighting, signage, enhanced access points and a compact surface providing safe access for all users. In addition to trail improvements, the project includes cleaning and pruning vegetation in the creek bed, and constructing erosion and flood mitigation measures throughout the corridor. The work in the creek will improve flow and aesthetics while maintaining the creek's natural riparian habitat.

Woodhouse's Toad (*Bufo woodhousii*) found along Granite Creek during the monsoon.  
Photo: Prescott Creeks

Hello Friend,

I'd like to start by saying: *Thank you!*

The support of donors like you is the key to protecting threatened riparian areas, restoring wildlife habitats, and improving polluted surface water quality throughout the Granite Creek Watershed and central Arizona. You made a difference this year.

Major projects like ecological restoration and water quality improvements are typically funded by restricted grants and contracts. They usually require matching funds of up to 50% of the project value – so your donations are essential to securing funding. Once built, the major project funds “dry up.” Communities rely on these projects and features for their ecosystem services (clean water, nature protection, wildlife habitat, pollution control), recreational opportunities, and simple peace of mind. Your volunteer time and **especially your cash contributions** are essential to the ongoing management, maintenance, and monitoring of these projects so that they remain safe and healthy resources serving future generations of the community.

Examples of progress you made possible this year include:

- Granite Creek Cleanup – The event saw record numbers of participants working together to achieve a common goal AND the Cleanup was recognized as a Copper member of the Voluntary Environmental Stewardship Program by the Arizona Department of Environmental Quality. Planning is already underway for an even better

Cleanup event in 2023.

- Volunteers – Volunteers at large, from the Master Naturalist Program, and many partner organizations were engaged throughout the year at Watson Woods Riparian Preserve to plant new trees, remove non-native species, manage trail usage, monitor wildlife, and demonstrate success of past projects with photographic monitoring.
- Citizen Science Programs – These programs improved knowledge and understanding of native plants, precipitation, and wildlife in the area. Phenology monitoring tracked seasonal lifecycles of vegetation, rain gauge monitoring showed this monsoon as the 4th wettest, and NestWatch, a developing program, documented three Common Black Hawk fledglings in the watershed!

***Your investment in Prescott Creeks and the types of projects above provides a strong foundation and is a catalyst for new opportunities.***

2023 looks bright! With your ongoing support, Prescott Creeks will continue working with its community partners to achieve healthy watersheds and clean waters in central Arizona. Restoration work that began this fall on Granite Creek downtown is scheduled for completion in the spring. Prescott Creeks will revegetate a reach of Miller Creek in cooperation with neighborhood volunteers and the City Public Works Department. And... in the Preserve's 28th year, we anticipate expansion of Watson Woods Riparian Preserve along with in-perpetuity protection through the establishment of a conservation easement.

You can help ensure these projects succeed. **Your gift will help Prescott Creeks secure at least \$24,000** of the unfunded portion of these projects. Won't you help Prescott Creeks bridge the gap? Your tax-deductible donation can be made securely online at [www.Prescottcreeks.org/Donate](http://www.Prescottcreeks.org/Donate) or by calling Prescott Creeks at (928) 445-5669.

Sincerely,

Michael Byrd  
Executive Director

*p.s. If you've already sent in your support, thank you! You should receive a formal acknowledgment soon.*

## You Made a Difference This Year

December 2022

[www.PrescottCreeks.org](http://www.PrescottCreeks.org)

[DONATE](#)

Hi Friend,

Your support this year made a difference! The Prescott Creekside E-News at the beginning of December featured a request for your support as part of our annual fundraising campaign to benefit local creeks and watersheds. *If you've already sent in your support, thank you!* You should receive a formal acknowledgment soon.

There is still time to [make your gift](#) before the end of the year. You can choose from a variety of ways for you to support Prescott Creeks - including automatic monthly donations!

Thank you for your support. It is an investment in clean water and healthy watersheds!

### Your Impact:

Photo: Virginia Wertz, Volunteer

**Granite Creek Cleanup** - Recognition for the event came from the AZ Department of Environmental Quality for the almost 52 tons of trash and debris collected by over 7,000 volunteers (2007-2022). Record numbers participated in 2022 with a 50% increase in trash collected during the event.

**Save the Date:** *Saturday, April 22nd for the 2023 Granite Creek Cleanup*

Photos: Common Black Hawk (Left), Stock Image; American Kestrel (Right), Everett Sanborn, Volunteer

The outlook is good for Common Black Hawks and American Kestrels at Watson Woods Riparian Preserve.

**Common Black Hawks**, which are not very common in the US with only about 250 known nesting pairs, arrived in the area with their fledgling from 2021 and proceeded to produce two fledglings from their nest this summer! Another pair of Common Black Hawks was observed nesting farther upstream on Granite Creek this year. That nest produced one fledgling making three new Common Black Hawks for Prescott in 2022!

**American Kestrels** are our smallest falcon which is in decline throughout its North American range. While no kestrels utilized any of the nest boxes in the Preserve this year, six male/female pairs of American Kestrels were released in the area during the summer. The birds were from a wildlife rehabilitation center in Phoenix. As of the last week of the year, there have been reports of multiple American Kestrels in the Preserve and Lakes areas, as well as many reports of sightings near nest boxes in the central Arizona program.

Special thanks for Everett Sanborn for getting out in the field regularly and providing many of the wildlife photographs you see in this newsletter and on the Prescott Creeks website!

Photo: Lindsay Ledesma, Volunteer

Volunteers made a difference by managing native and non-native vegetation , monitoring birds, improving trails and fences, planting trees, documenting restoration project performance, photographing wildlife, entering data, collecting trash, and so much more. Two new volunteers, Phil Taska & Donella Sas, joined the Prescott Creeks Team this year and have proven themselves indispensable!

Your support makes it possible for these people to do their part implementing the mission of Prescott Creeks! Opportunities can be found on the [Prescott Creeks website](#).

Photos: Prescott Creeks

Citizen Science Programs improved knowledge and understanding of native plants, precipitation, and wildlife in the area. Phenology monitoring tracked seasonal lifecycles of vegetation, rain gauge monitoring showed this monsoon as the 4th wettest, and NestWatch, a developing program, documented nesting of sensitive birds in the watershed!

### Your Support

All of this work underscores the importance of permanent protection for Watson Woods Riparian Preserve and other riparian areas!

You can help ensure these and other projects succeed in 2023. **Your gift will help Prescott Creeks secure at least \$24,000** of the unfunded portion of these projects. Won't you help Prescott Creeks bridge the gap? Your tax-deductible donation can be made securely online at [www.Prescottcreeks.org/Donate](http://www.Prescottcreeks.org/Donate) or by calling Prescott Creeks at (928) 445-5669.

Happy Holidays and thank you again for your ongoing support!

Sincerely,

Michael Byrd  
Executive Director
